

THE PROACTIVE BUSINESS & TAX MANAGEMENT PROCESS

For Healthcare Professionals

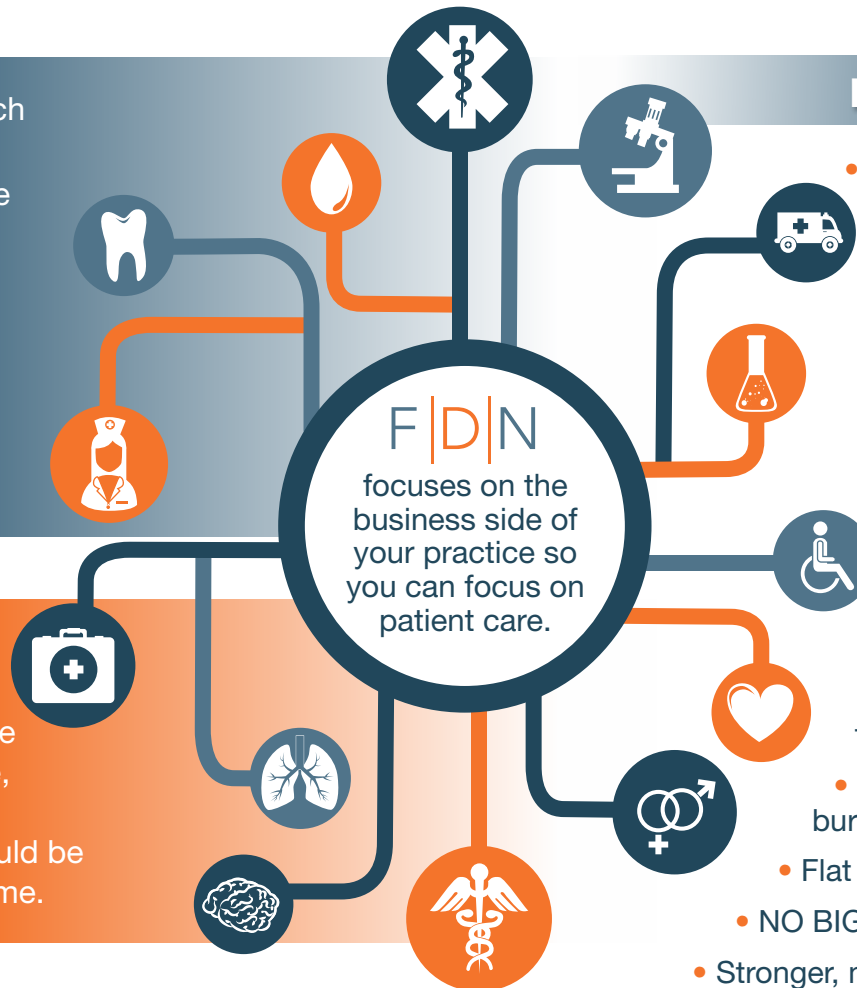

Frost Dana Newman (FDN) works with healthcare professionals throughout the country using a unique process that proves transformational to practices. With a comprehensive approach to business management and taxes, the role of the CPA changes from a once-a-year dreaded event (tax time!) to a year-round partnership that can significantly improve cashflow and profit.

DIFFERENT

FDN uses an integrated approach in working with healthcare professionals by taking an active role in a practice's payroll, bookkeeping and tax matters. With this full involvement, FDN is able to offer the most comprehensive, ongoing, proactive advice and guidance throughout the year.

BETTER

With FDN handling the payroll and bookkeeping functions, we are able to recommend proactive tax strategies as situations arise, many times creating tax saving opportunities that otherwise would be unavailable at tax preparation time.

BENEFITS AND RESULTS

- Entity and structure analysis and guidance
- Two-way communication throughout the year, without “nickel and dime” billing for phone calls and advice
- Monthly financial statements with data points (benchmarking and Key Performance Indicators) to better manage your practice
- Quarterly tax reports
- Guidance and solutions for improving AR turnover and managing the expense side of your practice
- Tax-saving strategies across all facets of your practice
- Greatly reduced time and stress burden in preparing for annual tax filing
- Flat fee for services provided
- NO BIG SURPRISES at tax time
- Stronger, more valuable practice
